| 2 AP2P | 43 | 30,5 | 20 | 8 | 8,5/12 | 10-12 |

PIG FEEDERS TURBO

FEEDER TURBO 1

- The drinking system not only provides the pigs with the exact the amount of water that they need, but with the nipple system dropping any wasted water into the food, the food consistency is moistened, making the consistency that much more agreeable with the pigs.
- The stainless steel bowl is perfectly designed to give pigs exactly what they need, when they need it and to reduce food wastage.
- Any adjustments required are simple to do and exact in measure.

FEEDER TURBO 2

- The large, deep stainless steel bowl reduces food waste and promotes hygiene, making for healthier pigs. Also, the bowl's design makes it easy to wash.
- The active system at the bottom of the dispenser prevents feed accumulation, ensuring no breakages in supply to the pigs.
- The unique construction makes it easy to regulate the food and water levels as your pigs get older.
